

Woody Wooddecker worked on our garden in November 2010. From start to finish he did a fabulous job! He gave us lots of advice on the design and helped us turn our 'safe' (and a little bit boring) plan into something great. The garden now contains decking, paving, stone and a pond! He and his co-workers worked very hard every day that they were on site, fuelled by lots of coffee!!! They were great to be around, always chatty and friendly but they got the jobs done really quickly and professionally. We are thrilled with the end result and the aftercare has been great – he is always on hand to answer questions about upkeep and maintenance. We are now looking forward to making lots of use of our new garden this summer...hopefully!
